

eIDocTM

Integrated Intelligent Automated Platform

Document Understanding | Intelligent Document Processing
Cognitive e2e Document Workflow Automation

eIDoc™

Enterprise level solution for **intelligent** document processing with world-class document recognition accuracy level, proved as a highly robust, reliable, scalable **integrated platform** for **end-to-end** intelligent document processing and document workflow **automation**

Delivering exceptional automation value through integrated Intelligent Automated Platform - **eIDoc**

The screenshot shows the eIDoc web application interface. The header is green with the 'eIDoc' logo and a navigation sidebar on the left. The main content area features a central graphic of a globe surrounded by laptops, with the 'eIDoc' logo and the text 'IDP & BPM Document management system' below it. At the bottom, there are four summary cards:

Category	Count	Description
Inbox	27	Documents which require actions from your side
Under control	27	Documents sent to "Execution"
In progress	27	All documents in the system which are currently in progress
Drafts	0	Documents saved as drafts

- ❖ Document Understanding leveraging cognitive technologies
- ❖ Business Process Management leveraging No Code capabilities
- ❖ Document and Content Management from anywhere

eIDoc IDP is equipped with all required out-of-the-box functionalities to deliver true intelligent automation value

IDP and BPM are two powerful modules available out-of-the-box in **eIDoc** – Intelligent Integrated Platform

eIDoc IDP

IDP - Intelligent Document Processing

eIDoc BPM

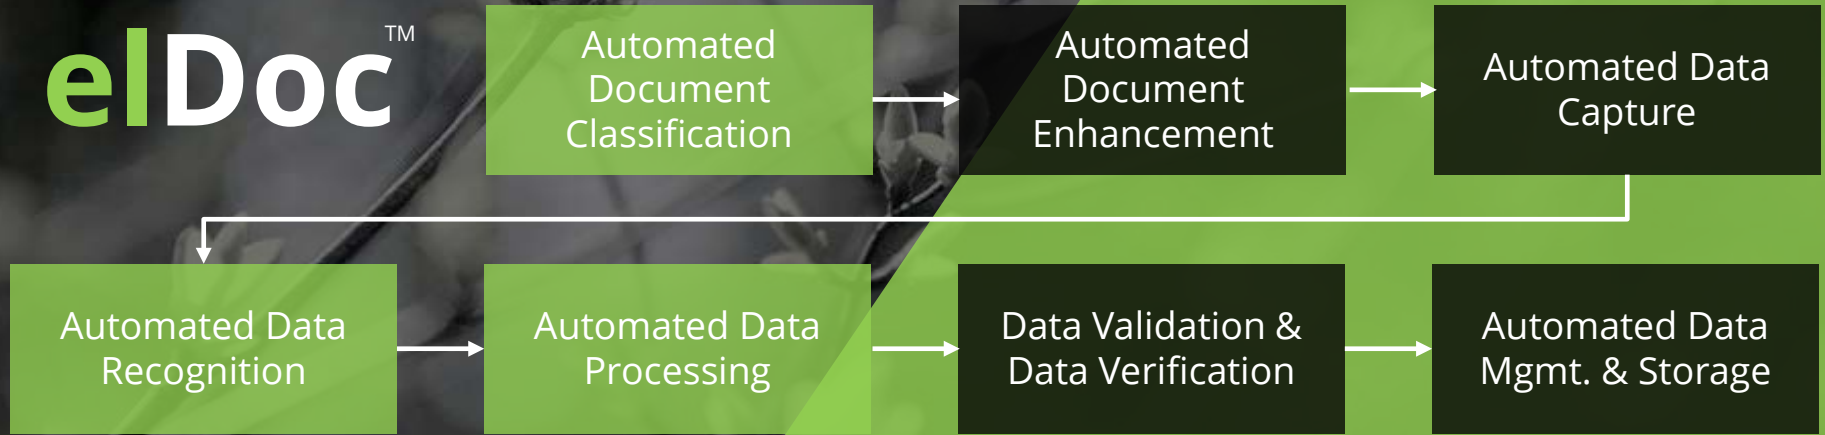

BPM - Business Process Management

eIDoc – Intelligent Document
Processing (IDP)

eIDoc IDP is all what you need to digitize your business through intelligent (cognitive) automation capabilities

eIDoc IDP is not just OCR, it is fully Integrated Intelligent Automated Platform for end-to-end document processing

Core

- OCR – Optical Character Recognition
- OMR – Optical Mark Recognition
- ICR – Intelligent Character Recognition

Intelligence

- Image enhancement / image pre-processing
- Multipage files (images) processing
- Target data extraction

Compliance & Security

- Access rights management
- Data validation, user authentication
- Audit, monitoring, log

Efficiency & Performance

- Analytics & Reporting
- Document archive, smart document search
- Access from any device

eIDoc IDP leverages AI and advanced mathematical models to be capable to classify the documents by type

The screenshot displays the eIDoc user interface. On the left is a navigation sidebar with options like Dashboard, Create document, Search by ID, Index, In progress, Recognition queue, Documents, Reports (beta), About, User manual, and Administration. The main area is titled 'Document: Recognition Document (Archive)'. It features a search bar with 'Revised' and navigation buttons for 'Previous' and 'Next'. Below this, there are sections for 'Document data' and 'Recognition data'. The 'Document data' section includes fields for Initiator (David Times), Document number (fret 2299/2021), Document subject (MultiDocFile2.pdf), and Created (27/01/2021 09:39). The 'Recognition data' section shows a search result for '2 - Document ConstituentDoc_v1 (92)'. Below this is a table with columns for Page range (inclusive), Recognition form, Company Name, Company Number, Company Address, and Presenter Name, with corresponding values for each. A 'References' section at the bottom lists a payment advice ID. On the right, the 'Attachments' section shows a scanned document titled '周年申报表 Annual Return Form NAR1' from the Companies Registry. The document is marked as 'View processed file' and 'Form Filed'. It contains fields for Company Name (RST Delivery Limited), Business Name (RST), and Registered Office address (UNIT 1005, 05, 10/F, HOLLYWOOD PLAZA, 610 NATHAN ROAD, MONGKOK, KOWLOON, HONG KONG).

Document classification and document type matching

eIDoc is powered with cognitive capabilities to be capable to identify and classify the documents by type. eIDoc is capable to detect variations / differences across submitted batch of documents what helps to further streamline data capture

Watch Demo

elDoc IDP leverages heavily Computer Vision technology to enhance the image before processing

The screenshot displays the elDoc IDP interface. On the left is a navigation sidebar with options like Dashboard, Create document, Search by ID, Inbox, Progress, Recognition queue, Documents, Reports (beta), About, User manual, and Administration. The main area is split into two panels. The left panel shows a document with a noisy background, and the right panel shows the same document after processing, with the noise removed and text clearly legible. The processed document is an invoice from FLP INSTRUMENT CO., LTD. to HKS (China) Ltd. The invoice includes a table of items and a total amount of HKD 26,968.00.

#	Item	Brand	Origin	Qty	Amount/Price	DWG
1	RS 21.500	SP	SEA	1.0000	HKD 20,000.00	RS 21.500
2	MM 20.000	SP	SEA	1.0000	HKD 2,000.00	MM 20.000
3	RS 10.000	SP	SEA	1.0000	HKD 2,000.00	RS 10.000
4	RS 12.000	SP	SEA	1.0000	HKD 2,000.00	RS 12.000
5	MM 10.000	SP	SEA	1.0000	HKD 2,968.00	MM 10.000

Document enhancement, image pre-processing capabilities

elDoc leverages Computer Vision Technology and advanced mathematical algorithms to normalize (enhance) the image before processing (image right-sizing, rotation, whitening background, removing unnecessary artefacts, noise, image cropping, enhancing contrast, etc.)

Watch Demo

eIDoc IDP advanced document processing capabilities make it possible to process multi-page documents

The screenshot displays the eIDoc IDP interface. On the left is a navigation sidebar with options like Dashboard, Create document, Search by ID, Inbox, In progress, Recognition queue, Documents, Reports (data), About, User manual, and Administration. The main area is split into two panes. The left pane shows a table of documents with columns for Invoice #, Asset #, SR #, and Model. The right pane shows a detailed view of a document titled 'Invoice#21_14p_01_14doc.pdf (605 kb)'. It features a large data table with columns for Invoice #, Asset #, SR #, Model, Company Name, Company Code, and Date. The table contains multiple rows of data, demonstrating the system's ability to handle multi-page documents.

Multi-page and multi-documents files processing

eIDoc easily copes with processing files containing different types of the documents that are spanning across hundreds of pages / or documents where data table dynamically spanning across multiple pages

Watch Demo

elDoc IDP facilitates converting human-handled data into structured and usable data

The screenshot displays the elDoc software interface. On the left is a navigation sidebar with options like Dashboard, Create document, Search by ID, Inbox, In progress, Recognition queue, Documents, Reports (pdfs), About, User manual, and Administration. The main area is titled 'Document: Recognition Document (Archive)'. It features a 'Document data' section with fields for Initiator (David Tones), Document number (10123052021), Document subject (Invoice18_tp_18_10ct.pdf), and Created (27.01.2021 10:06). Below this is a 'Recognition data' section with a table showing page ranges and recognition forms. The 'Attachments' section displays a scanned invoice from Techno Co., Ltd. with a 'Delivery Information' table and a 'Payment Terms' table. The 'Delivery Information' table has three rows: 'Direct delivery' (100), 'Shipping address 1' (100), and 'Shipping address 2' (100). The 'Payment Terms' table shows a total amount of 1,800.00.

Page range (inclusive)	Start	End
1 - Document Invoice_v7 (p1)	1	1

Access to content storage 24/7 through secured mode

eIDoc provides robust and secure framework for document archive and content storage. Powerful content search engine with granular access right management capabilities enables to find any document or even fragment of text among thousands of records

[Watch Demo](#)

eIDoc IDP: granular access rights management capabilities are key to achieve highest security standards

The screenshot displays the eIDoc IDP interface for a document form titled "Delivery Contract (td24)". The interface is divided into several sections:

- General settings:** Includes fields for "Document name (EN)" (Delivery Contract), "Document form status" (Active), "Document folder", and "Assigned processes" (Delivery Contract Approval).
- Settings:** A tabbed interface with "Form builder" and "Document templates" options.
- Create document:** A section with a checkbox "Document form is accessible to all users for creation" and a list of users: Nicholas Alvarado, Theresa Bennett, Tim Carter, and Judy Cox.
- Register document automatically:** Includes a checked checkbox "Enable automatic document registration" and a dropdown menu for "Register document on the process phase" set to "Approving".
- Edit document:** Includes a dropdown for "Allow to edit document by Author on stage" (Draft) and a dropdown for "Allow to edit document by DocumentsAdmin (RW) on stage" (Draft).
- Document default access:** Includes a checked checkbox "Allow document access modification" and a list of departments: Finance Department and Sales Department.

The interface also features a sidebar on the left with navigation options like Dashboard, Create document, Search by ID, and Administration. The top right corner shows the user's name "James D." and a profile icon.

Providing access to data only to authorized individuals

User authentication, access control, granular access rights management capabilities, document version control, audit, actions log - all is what required to build robust and secured collaboration framework accessible from anywhere

eIDoc – Business Process
Management (BPM)

eIDoc BPM: building custom document workflow with no code features delivers automation results faster

#	Phase	Phase activated
#0	Draft	<input checked="" type="checkbox"/>
#1	Approving	<input checked="" type="checkbox"/>
#2	Signing	<input checked="" type="checkbox"/>
#3	Execution	<input checked="" type="checkbox"/>
#4	Repository	<input type="checkbox"/>
#5	Active	<input checked="" type="checkbox"/>

Create your custom document workflow without programming

Building your document workflow has never been easier. You do not need any more to involve programmers to develop custom document workflows. End-user can now easily build, change, customize process flow even "on the fly" utilizing built-in Process Flow Designer

[Watch Demo](#)

eIDoc BPM: online document collaboration from any place and any device drives greater efficiency

The screenshot displays the eIDoc BPM interface for a document titled "Document: Contract (Draft)". The interface is divided into several sections:

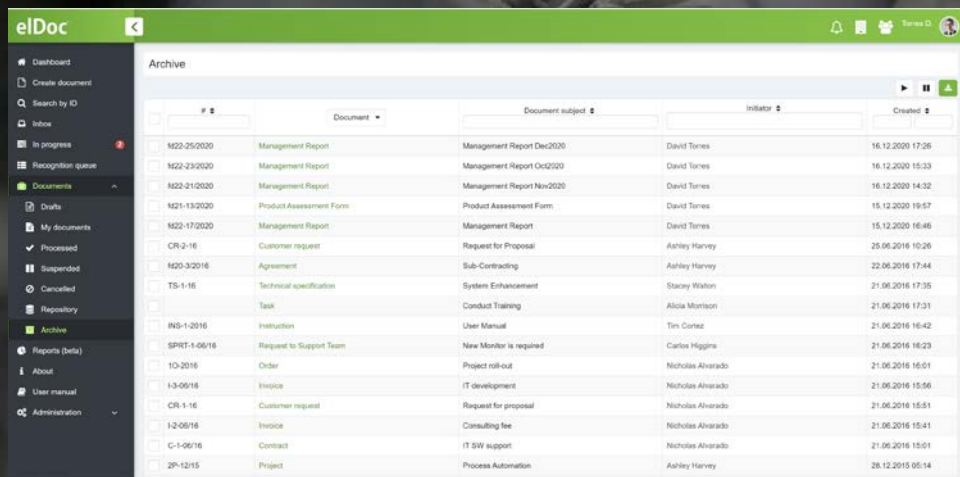

- Document data:** Includes fields for Initiator (David Jones), Document subject (PBA Professional Services), Created (05.01.2021 09:37), Deadline (21.01.2021 06:00), Counterparty (JIT Co), Budget (87,000.00), and Budget (87,000.00).
- References:** Lists related documents such as "20-2016 On accounts migration Order" and "20-12-15 Process Automation Project".
- Attachments:** Shows a template attachment "Template - DMS - Client-PBA Master Service Agreement.docx (25 KB)".
- Comments:** A text area with a rich text editor and a message: "Dear Finance Team, Please be so kind to review the contract and provide your comments during the next week. Thank you for your quick response!"
- Assigned process:** A table showing the workflow with columns for Approving, Signing, and Execution. The Execution table has columns for Stage, Responsible, Resolution, Deadline, Comment, Author, and Actions.

One platform – various document collaboration capabilities

eIDoc - is all what you need for efficient real-time document collaboration: create, edit, review, approve and sign off documents online; delegate your authorities when required; set deadlines with further follow up and e-mail notifications, collaborate instantly online

About US

Who we are?

«DMS Solutions» is a Technology company delivering Intelligent Automation Solutions. «DMS Solutions» is a vendor of Intelligent Integrated Platform for Document Processing (IDP – Intelligent Document Processing) and Document Workflow Automation (BPM – Business Process Management) - «eIDoc».

We leverage Machine Learning and Artificial Intelligence to build a powerful digital workforce for your business to win on the market. We focus on exploring new ways to apply disruptive technologies and recent inventions to bring innovative automation solutions in.

Where we operate?

Our Clients are high-performing enterprises coming from different industries: banking & financial services, insurance, logistics, healthcare, manufacturing & retail, real estate, transportation, oil & gas, energy, etc. We operate globally with having HQ in Hong Kong.

Where we go?

We are targeted at building democratized intelligent tech ecosystem that will be driven by open source AI and Machine Learning capabilities for the benefit of business – humans
